What's slowing you down? Here are some signs your software delivery system needs a tune-up—plus how to fix the problem

Symptoms

Here are some of the symptoms of software delivery stagnation that suggest a system tune-up is needed.

Diagnosis

Why does delivery stagnation occur? Here are some of the root causes that produce the above symptoms.

Tune-ups

How do you fix the problem and get delivery back on track? Stagnation or a lack of quality are often a sign that an organization has outgrown its delivery model. The expertise of a managed services partner can diagnose the problem, fix issues, and get software delivery back on track and up to speed.
